Lennox and Addington County Museum and Archives

Index to the Photograph Holdings by Subject - Volume One

CONTENTS OF INDEX

Compiled by Jennifer Bunting, Printed February, 1985 and updated in 2020. This index provides access to all photographs accessioned before 1981, with the following exceptions:

Not included:

- Glass negatives
- Photograph albums framed photographs (as of 1985)
- Daguerreotypes
- Ambrotypes
- Framed tintypes
- Photographs from other institutions
- Photographs taken strictly to document curatorial functions
- Photographs which are still under copyright stereoscopic slides - for which a separate index has been prepared
- Celia File Collection, Parks Collection, and Warner Collection

USING THE INDEX

The index is in two parts. The first part, on white paper, is in order of item number ("negative number"). The second part, on buff paper, is a subject index. The white index shows all cross-references assigned to each item. By referring back to the white index, the user will often be able to ascertain quickly whether a photograph is likely to be useful or not.

The main entry occupies all columns across the page. Cross-references occupy only the first and second column.

When the collection contains more than one accessioned copy of a view produced from a single negative, both copies are shown, but only one negative number is used. If a single photograph was used in a variety of ways, for pcs, for instance, and in published sources, only one number is assigned as only one original negative is the origin of all copies.

Every effort has been made to validate the identification of each item. For instance, items are used as costume reference material only if the precise year the photograph was taken is known. Educated guesses are clearly defined by square brackets. In the date column, unverified years are followed by one of three codes: 1900a = after 1900; 1900b = before 1900; and 1900c = circa 1900. The letters were placed after the dates to aid machine retrieval.

ABBREVIATIONS

Title:

Material in square brackets may be editorial comment or curatorial information. Trade names of pcs, useful for dating, are usually represented in square brackets, including "AZO" postcards, C.S. (Canadian Souvenir Postcards), etc.

Type

- a = albumen
- cl = clipping, also cli
- da = modern print taken from daguerreotype
- gn = modern print taken from glass negative
- p = undefined photographic process
- pr = undefined print process
- sl = 35mm slide
- st = modern print taken from half stereoscope view
- t = modern print taken from tintype
- pc = postcard
- + = see also

USE OF COLLECTION

Original photographs are never loaned for exhibition. Reproductions may be used for scholarly research, publication or display. When used for display or publication, credit must be given to the Lennox and Addington County Museum. Reproduction of items from the collection for resale, or any form of commercial activity, is not permitted.

OBTAINING COPIES OF PHOTOGRAPHS

Black and white 5 x 7 or 8 x 10 copies of photographs may be ordered from the museum for a fee. When ordering, the customer should indicate whether the copy is for research, display or publication, and whether glossy or matte prints are required. When the item is for publication: glossy prints will usually be sent. Xerox copies are available at cost. These are sufficient for the researcher to determine whether the photograph might be useful but cannot be relied upon to reproduce detail.
